CLIMATELAUNCHPAD
RUNNER UP

ASEPTIC PROCESSING MACHINERY

Extended shelf life. Zero preservatives

No cold storage

Retains aroma and taste

Technical Specifications

PARAMETERS	SPECIFICATIONS
Capacity	200 kg/h and 500 kg/h
Processing Type	Aspetic, Pulp/Puree/Concentrate
Material	SS 304/316
Power Requirement	3-Phase, 415V, 50Hz (Variable by Component)
Operating Temperature	Up to 140 °C (Sterilization)
Cleaning System	Integrated CIP (Cleaning-In-Place)

Output - Aseptic Fruit Pulp

**NO
Preservatives**

**18-months
Shelf Life**

**No
Cold Storage**

**Natural Taste
and Aroma**

DEHYDRATION SOLUTIONS

Efficient Heat Transfer. Low Fuel Consumption

Heat Pump Dehydration Systems

- Drying at 50-60°C
- Requires 3 times less energy than traditional dryers
- Retaining natural color, taste, and nutrients
- Tray and Tumble models for versatile processing needs
- Offered in capacity range from 200 kg/hr to 3000 kg/hr

Twin-Belt Press

- Multiutility twin-belt press for efficient juicing and dewatering of your material stream
- Precise and rugged design, enabled at low cost
- Capacity from 1000-3000 kg/hr

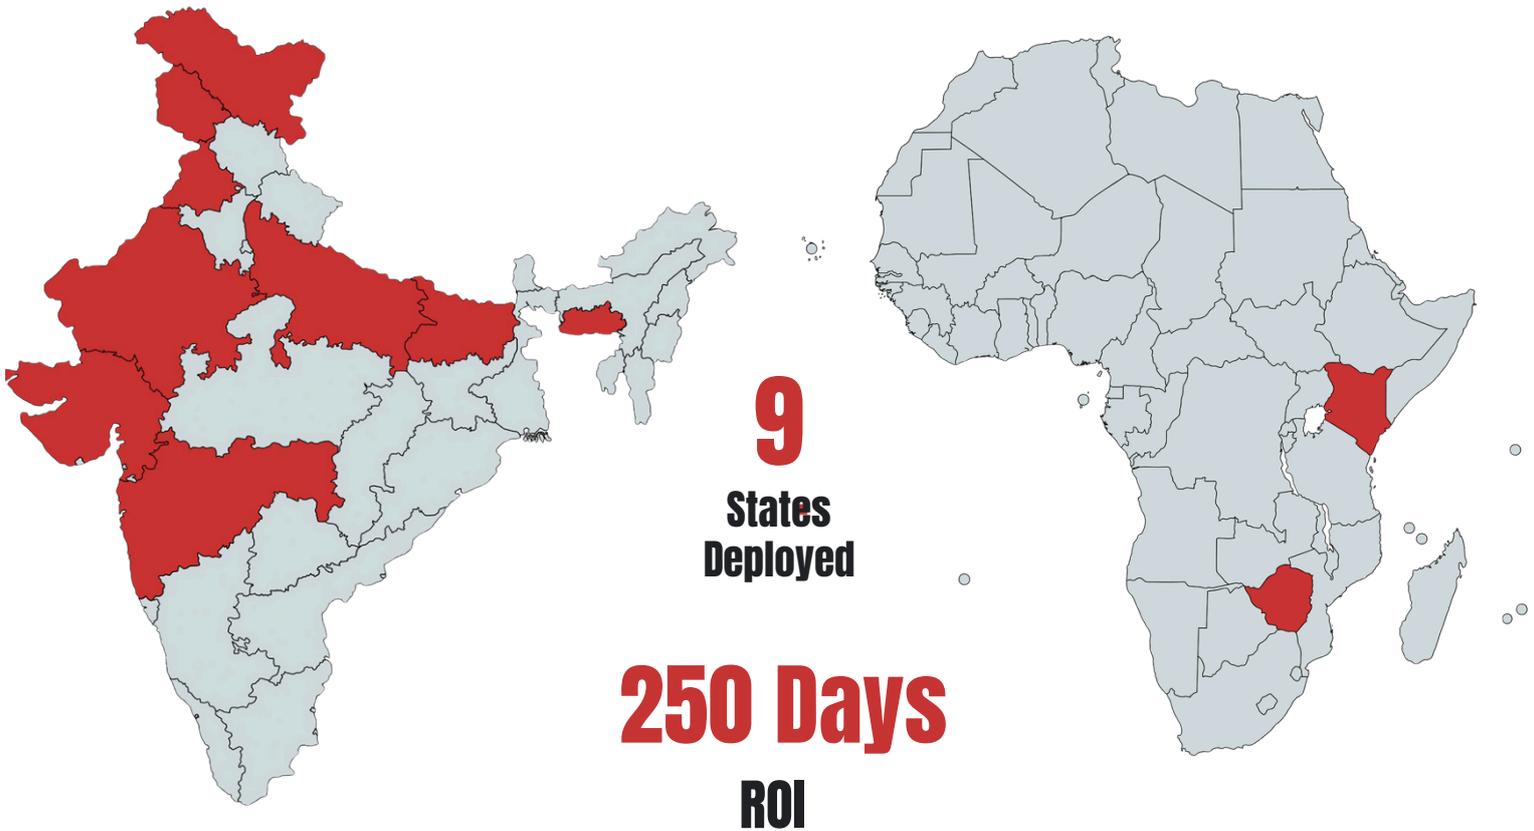

Evaporator

- Forced-vacuum continuous evaporators for low-temperature, energy-efficient concentration of fruit pulp, juice and other viscous fluids
- Preserving quality and enabling high-end processing at small-scale

TECHNOLOGY CONSULTATION

We provide comprehensive technology consultation for food businesses, assisting with equipment selection, plant layout, process validation, compliance, and market readiness.

COSTUMER TESTIMONIAL

We value "SNL Innovations" for their strong technical innovation and built quality. The Aseptic Line supplied by them is a cornerstone of our operational success. It has widened our products range with low operational cost and superior quality. Thanks to team SNL.

Sunil Yadav (Director)

Fill pure Foods, Haryana

SNL Innovations' 1.5TPD pulping machine has streamlined our mango and kinnow processing with efficiency, quality, and reliability—highly recommended!

Anil Jain

Arihant Agro, Punjab

SNL Innovations' Seabuck Thorn pulping units are efficient, reliable, and consistently deliver high-quality output. We installed the unit in August 2025, and the product quality has been exceptionally good.
